

Type 8542-1040

Digital input modules are used for sensing ON / OFF voltage levels. All input modules have filtering on the input of a hysteresis amplifier for high noise rejection and transient free "clean" switching.

Each module provides up to 4000 Vrms of optical isolation between the field inputs and the output side of the circuit.

FEATURES

- Four channel per module packaging
- Convenient pluggable wiring terminals
- Powered by a single 5 volt power supply
- 4,000 volt transient isolation
- Channel specific LEDs
- Operating temperature 0° to 70°C
- UL, CSA and CE approved
